

# GSIM READER USER GUIDE for USB CR31 product only.

Step 1 Copy the Contents of the GSimReaderApp\_V1.0.7.2 reader C.D to your Desktop.

There should be two files titled GSMReader.exe and SimReaderDLL.dll.

Step 2 Double click the GSMReader.exe file and this window will appear on screen.

Step 3 Plug your card reader with your Sim card inserted in the Sim card slot

This application allows you to copy from and to the selected Sim card. It allows the editing and saving of numbers and text messages to and from the Sim. It also allows you to change your pin using the PIN management at the top of the window.

Hint: Move your mouse over one of the buttons in the window to reveal its use.
