

Information Folder KÖNIG SUPERMASTER Starter Kit

The revolution in the field of 1:1 replacement remote controls

A new era in remote technology begins!

The new König Supermaster is the first replacement remote control that replaces more than 70.000 OEM TV remote control devices.

What you need: PC with serial port, the supplied interface adapter and a CD containing the software. Simply install the infrared system of the original remote control on the replacement device. The software and infrared data is continuously updated and can be downloaded from the Internet. Alternatively, order a free update on CD ROM.

Advantages:

- » Instant customer service thanks to fast programming at your shop
- » A single device replaces more than 70.000 original remote control devices
- » Huge cost savings and reduction of stock risk

SETUP:

Insert the supplied CD ROM in the drive and start SETUP.EXE. Complete installation by following the instructions on the screen. Open the König Supermaster software and click the SETTINGS button to edit settings such as language or COM port definition.

*See how easy it is!
4 steps & off you go!*

1. Connect remote control to PC

Connect the interface adapter to the built-in interface at the rear of your König Supermaster device.

2. Select original device model

Select the device type (TV) and brand. Select the original remote control in the left section of the window. Alternatively, enter the number of the original device.

3. Install IR system

After having selected the original device, click the INSTALL button. The selected IR system is being installed on your Supermaster device. The program shows you the individual steps of the installation. After successful installation, a message appears informing you that the process has been completed.

4. Insert batteries & off you go!

All you have to do is insert new batteries and hand over the replacement remote control to your customer.
