Manual for Using KN-SMP20 by Android Mobilephones

KN-MP20 or other comparable Products with cable

The cable Connection works directly with all i-Phones, but in the most Cases for Android Mobile Phones it is neccessary to make a setting in the Android Setting like discribe in this short Presenation

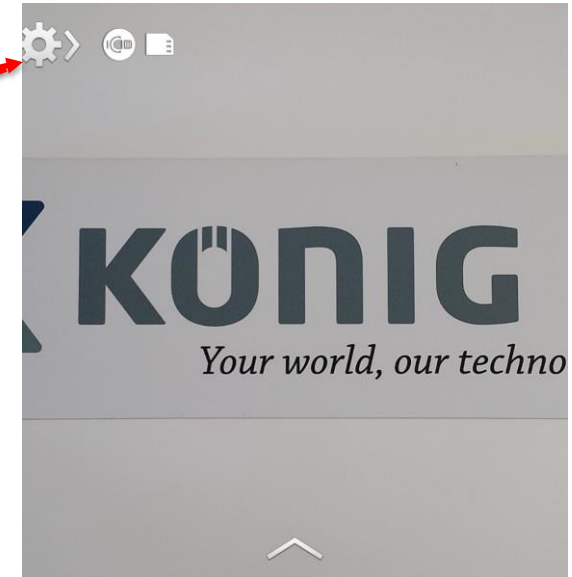

For example with Samsung S4...

It not an issue about the Selfiestick it depence on the Android Version...

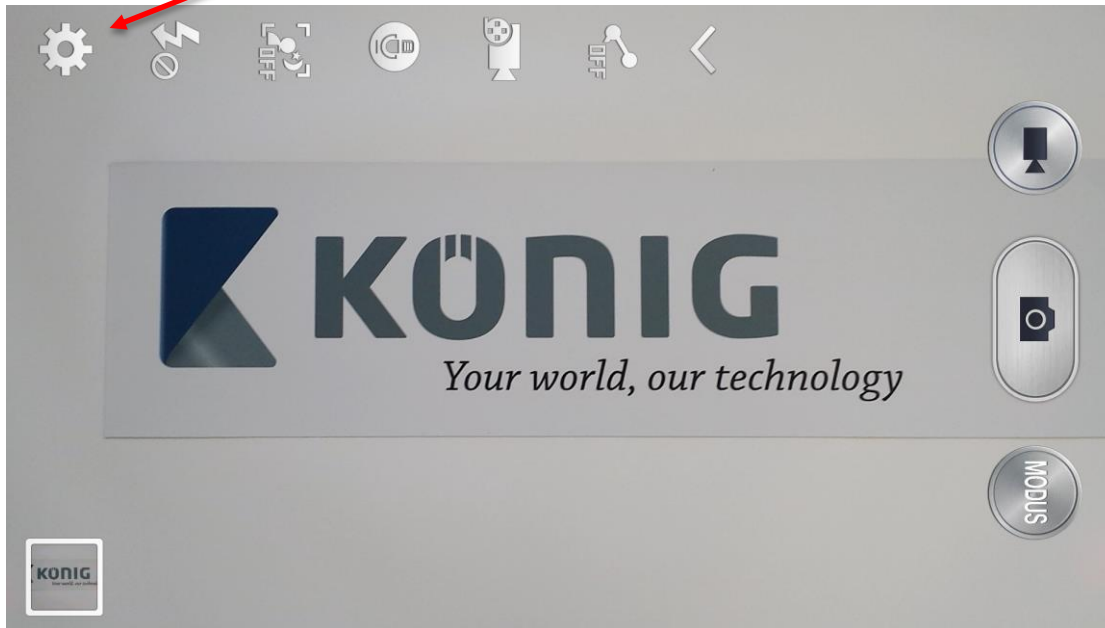

Good Luck!

Before using the Selfistick go in the settings in the Camera App...

1.

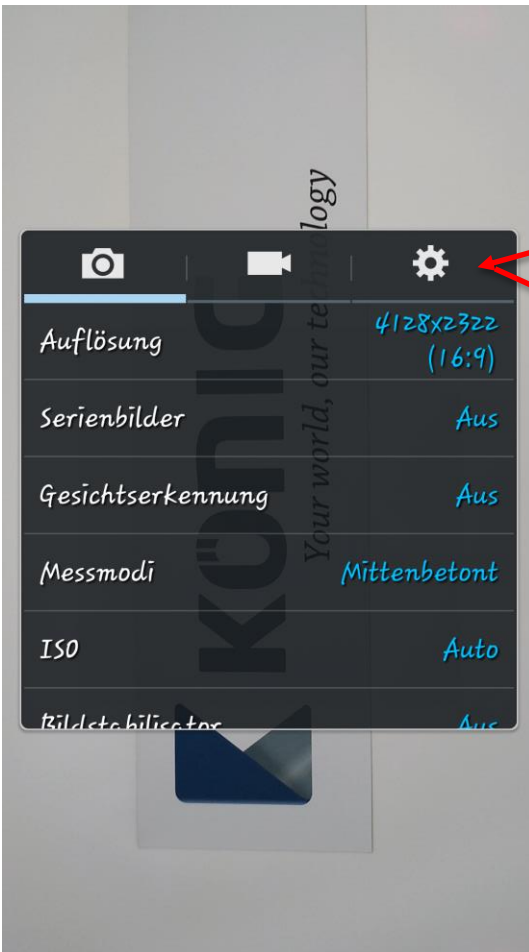

2.

Then again in the Settings...

3.

Then then choose the Volume Button as Camerabutton

4.

After this setting you can use the cable connected Selfiestick ! But the Zoom funktion will be only works over the Display
