

Ontech GSM 9030

Control remotely and alert over GSM network

With **Ontech GSM 9030** you can simply remotely control radiators, alarm horns, pumps or other electrical equipment in your summer house, your working place or other locations.

Just plug in your equipment in **Ontech GSM 9030** and where ever you are you can remotely control it.

Ontech GSM 9030 is also equipped with two alarm inputs and it alerts you with SMS. There is also a temperature watch. With the thermostat function you can control the heating.

You can use all kind of SIM cards!

Ontech Relay 9010 is an optional unit that is controlled by **Ontech GSM 9030** with short range radio. Up to 7 extra units can be connected and individually controlled by **Ontech GSM 9030**. Of course the extra units have two alarm inputs each.

Ontech GSM Mini 9030
