NOTE	Ripple & noise are measure Tolerance: includes set up The power supply is conside complete installation, the fire Suitable for indoor use or or	parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. Dole & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. Berance: includes set up tolerance, line regulation and load regulation. The power supply is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the applete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
