PRODUCT SUMMARY	
V_{DSS}	100 V
I_D DC	180 A
$R_{DS(on)}$	0.0065 Ω

DESCRIPTION

5th Generation, high current density Power MOSFETs are paralled into a compact, high power module providing the best combination of switching, ruggedized design, very low on resistance and cost effectiveness.
The isolated SOT-227 package is preferred for all commercial-industrial applications at power dissipation levels to approximately 500 W. The low thermal resistance and easy connection to the SOT-227 package contribute to its universal acceptance throughout the industry.
