NOTE	Ripple & noise are measure Tolerance : includes set up The power supply is consided EMC directives.	cially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. Sured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. up tolerance, line regulation and load regulation. sidered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time.
