

OKY3463-2

Product Name:6V/12V/24V/28V 3A PWM DC Motor Speed
Controller Voltage Regulator

Product Module: OKY3463-2

Product Description:

- 1.This DC Motor Speed Controller allows controlling the direction of a DC motor using a Pulse-Width-Modulated (PWM) DC voltage with a Duty Cycle fully adjustable from 0%-100%.
- 2.The motor speed controller can easily provide a continuous current of3A to your DC motor or other DC load.
- 3.Input supply voltage:6V-28VDC.
- 4.The maximum output power: 80W.
- 5.The maximum continuous output current :3A.
- 6.Duty Cycle adjustable:5%-100%.
